

Color is Fun

I had fun with the Easter Egg coloring, and the bunnies that got made, are, IMO, pretty cute:

And then I knit with the yarn that I kettle-dyed too - and I'm pretty happy with how they came out. It was made with a combination of food coloring - red and blue and yellow, with what I thought was a teeny bit of green acid dye (I was wrong, it was a lot). Not bad for a first effort!

Revknits

Faith and life seen through the stitches we make.

I'm torn. I don't need a pair of socks, but I like them a lot. But a child/youth in Afghanistan needs them more!
